“Natural Soilutions”™

NON PLANT FOOD INGREDIENT:

40% Humic Acids derived from Leonardite.

***Keep out of reach of children.
May be harmful if swallowed.***

Net Weight: 1.5 lbs. (680 gms)

Our Story

Marilyn's Own® is a highly concentrated granular natural soil conditioner that has been decomposing for millions of years. It is a mined material rich in humic acids. Many mineral deposits exist in the world, however there are differences in their characteristics. Marilyn's Own® is mined from a site with a sand matrix, originally fresh water, and located just below the earth's surface. Allowing air to exchange during decomposition has created a rich and stable natural material.

APPLICATION RATES

1 lb. = 1 1/8 cups = 9 oz.

Flowers / Vegetables: 1 lb. per 100 sq. ft.
Containers / pots: (Level measure)

4" Pot	1/4 Teaspoon
8" - 1 Gallon Can	1 Teaspoon
