Products for a Natural Sustainable SOILution™

Tri-C Bioswale SOILutions™.....Naturally Beneficial

Bioswale Growing Medias **can be customized upon request**		
	Very BASIC Media	OPTIMUM Media
Coarse SAND	X	X
PEAT MOSS	X	X
TRI-C HUMATE	X	X
TRI-C ENDO 120		X

****22 Ton Bioswale mix covers 1,000 sq.ft. @ 6 inch depth, HOWEVER necessary quantities will be project specific.**

MIX Proportions(ratios): 90% Sand, 10% Reed Sedge Peat Moss, 4 lbs. Tri-C Humate, 4 lbs. Tri-C Endo 120

BLENDING: Material shall be blended prior to delivery by a twin screw pug mill or equal. This method ensures thorough blending of all materials. Bucket blending is NOT equal.

Benefits of Bioswale Components: Designed to optimize filtration of water, remove or neutralize contaminants, and therefore providing an environment that encourages native plant growth. *Natural SOILutions for our environment.*

1. **Coarse Sand:** Washed Concrete Sand per ASTM C33> Encourages FILTRATION
2. Reed Sedge **Peat Moss:** Provides organic matter for plant growth
3. **Tri C Humate** : a concentrated organic soil conditioner that provides organic matter; carbon; humic acids; beneficial bacteria; minerals; performs in extremely challenging soil conditions and safe in environmentally sensitive conditions. Helps filter out contaminants.
4. **Tri C Endo 120** Mycorrhizal fungi form the foundation of ecosystem function. Increased root systems provide plant survivability, improved soil structure.
